

2 – Access to School Facilities

Positive work has happened over the past few months between the Education and Leisure and Communities Departments, resulting in increased access to school facilities, particularly for swimming during holiday periods. After approval from the Director of Education and positive commitment from front line staff, there is now a full programme of swimming being operated by Dundee Swimming clubs within education pools to start in the summer of 2010. This positive approach has resulted in the clubs being able to expand their programme for their athletes and to promote their club to new participants with the holiday periods in each community for the first time. It is hoped to continue with this positive work for future holiday programmes and to expand to the term time and weekend access as well.
